

Hypertext Markup Language will contain:

- Head, which contains important metadata
- Body, which contains all of the content seen on the page
- Tags in the format of `<tag>content</tag>` or `<tag attribute>content</tag>`
  - Examples:
    - `<h1>Broncos Beat the Chiefs</h1>`
    - `<img src= "broncos beat the chiefs" alt= "Broncos destroyed the chiefs">`  
(no closing tag needed)
